Could this happen in your business?

A big printing job had to be done at top speed. The buyer telephoned a certain printer. The line was "busy". Three more times he called at short intervals. Each time the line was in use.

Then the buyer telephoned another printer, reached him immediately and gave him the job.

One added telephone line would have saved that order.

Buying, selling, negotiating by telephone is increasing rapidly. Within two years the number of telephones in New York City has increased over 20% and over a million more calls are made daily.

Have you increased your telephone equipment enough to get your share of the greater business that flows each day over telephone wires?

Lines, instruments, or any other equipment you need can be ***quickly*** provided. Just notify our nearest Business Office.

The Wall Street Journal says: "More business is being done in Wall Street over the telephone than ever before in the history of the financial district."

And what is true in the financial world is true in every other line of activity in New York today.

Information for Telephone Users

General Directions

OBTAIN telephone numbers from the latest issue of the telephone directory. If you do not receive a current directory, call the Business Office. If you cannot find the desired number in the directory, obtain it from "Information." "Information" does not, however, furnish numbers listed in the directory. There is no charge for calls to "Information."

In order to secure new telephone service, adjust accounts, change directory listings, obtain directories other than those ordinarily distributed, arrange for removals and other similar matters, call the Business Office. You can determine the telephone number and address of the Business Office which handles your account by consulting the list shown on page 13. There is no charge for such calls.

To Help You on Your Local Calls

A LOCAL call is one to any telephone bearing the call number designation of a central office, which is included in your local service area. Your local service area is indicated on page 12. Local calls from manual telephones should be made by number according to the instructions shown on the following page. If you have a dial telephone, dial the call direct according to the instructions shown below.

How to Make a Local Call From a Dial Telephone

WHEN consulting the directory, it will be noticed that the first three letters of the central office names are capitalized.

These three letters, then the figures and party line letter, if there is one, should be dialed.

Suppose, for example, you are calling JOHn 7607:

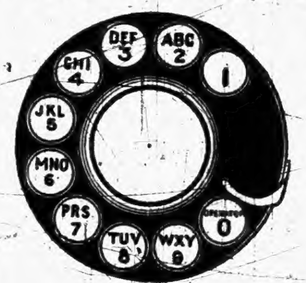
To call this number, it is necessary to dial J-O-H-7-6-0-7 in the following manner:

Remove the receiver from the hook,

listen for the DIAL TONE, a steady humming sound, which indicates that the line is ready for you to dial. DO NOT start to dial until you hear it. If you do not hear the dial tone after waiting a short time, hang up the receiver and try again a little later.

After hearing the dial tone, keep the receiver off the hook until you have finished with the call.

Place your finger in the hole through which the letter "J" is seen, and pull the dial around until your finger strikes the finger stop. Raise the finger and allow the dial to return to its original position. Do not touch the dial while it is turning back.



Ready to dial "6"—The last figure given in example.

The dial pulled around to finger stop.

Repeat the operation for the letter "O" and then for the letter "H". You have now dialed the first three letters of the central office name.

Repeat the same operation for the figure 7, then 6, then 0 (zero) and then 7.

In a very short time you should hear either the ringing signal, an intermittent burr-rr-ing sound indicating that the called station is being rung, or the busy signal, a rapid buzz-buzz-buzz (quicker and louder than the ringing signal), indicating that the called line is busy.

If you do not hear either signal within half a minute, hang up the receiver, wait a few seconds and dial again. Make several such attempts if necessary and then if you still do not hear either the ringing signal or the busy signal report the condition to the operator. To reach the operator place your finger in the hole through which the word "OPERATOR" is seen, turn the dial to the finger stop and release it.

Note: When you are through with the call, hang up the receiver for a few seconds before dialing another number.

Uncompleted Calls

When, for any reason, you do not obtain a connection (for example the called line is busy or does not answer, or you do not hear the ringing signal) you will usually get quicker service if you try the call again yourself at intervals, instead of immediately calling the operator for assistance. *No charge is made* unless you obtain an answer from a subscriber's telephone.

Assistance Calls

In case you have trouble in dialing a call, or if you wish to report service irregularities, dial the operator and explain the circumstances to her.

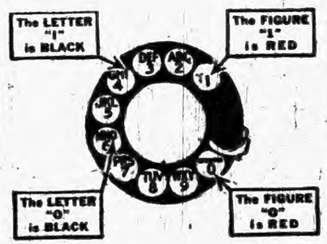
Party Line Subscribers

Before starting to dial, listen in the receiver to make sure the line is not in use. If no dial tone is heard, inquire if the line is being held by some other subscriber. If no response is received, hang up the receiver for a few seconds and then make another attempt. If, after you dial, you hear another party come in on the line, inform him that the line is in use and request him to hang up his receiver. When he does so, hang up your own receiver for a few seconds, then remove it and dial the complete number again.

To call another party on your line, dial the operator, give her your number and the number you wish to call, and state that it is the number of another party on your line.

Dialing Cautions

On the dial all *LETTERS* are shown in *BLACK* and all *FIGURES* in *RED*.



It is very important to distinguish between the black letter "O" and the red figure "0" (zero), and between the black letter "I" and the red figure "1" (one). Failure to do so will result in wrong numbers.

Always listen for the dial tone before starting to dial.

Do not dial numbers which are not included in your local service area which is indicated on page 12.

In dialing the service call numbers which are shown on the cover of this directory, do not dial any letters preceding the numbers.

If the dial slips or if you have made a mistake, hang up the receiver for a few seconds, then remove it and dial the complete number (letters and figures) again.

Do not "jiggle" the hook or touch it while dialing, while waiting for the called telephone to be answered, or while talking.

To Call an Extension Station Connected with Your Line

Dial the operator, give her your number and ask her to ring the extension station connected with your line.

How to Make a Local Call From a Manual Telephone

GIVE the number to the operator in the following manner:

CANal 0027 say "Canal oh-oh—two-seven."
JOHn 1353 say "John one-two—five-three."
MAIn 2125-J say "Main two-one—two-five-J."
HANover 4800 say "Hanover four-eight—hundred"
WORth 5000 say "Worth five-thousand."

Listen to the repetition of the number. If it is correct, say "Yes" or "Right." If it is not repeated correctly, say "No" and give the number again.

If you are calling from a party line message rate station, announce the letter of your station, if there is one, after giving the number as above. Example, "Worth five thousand, this is 'J' calling."

In a short time you should, in most cases, hear either the ringing signal, an intermittent burr-rr-ing sound, indicating that connection has been established and ringing is in progress, or the busy signal, a rapid buzz-buzz-buzz (quicker and louder than the ringing signal) indicating that the line of the called number is busy. When you hear the busy signal, just hang up your receiver without waiting for a report from the operator and make the call again later. There will be no charge unless an answer is obtained from a subscriber's telephone.

Where these audible signals are not provided, reports will be given by the operator.

Other clicking sounds or tones may occasionally be heard. Such sounds, however, are incidental to the operator's work and should be disregarded.

To call back the operator (from a manual telephone) move the receiver hook up and down *slowly*.

Do not hang up the receiver until you are ready for the operator to take down the connection.

Emergency Calls

Manual and Dial Telephones

POLICE! FIRE! AMBULANCE!

Just give your number to the operator and say, "I want a policeman," "I want to report a fire," "I want an ambulance." If you have to leave the telephone before the desired station answers, tell the operator where help is required. These calls are free. From dial telephones the Police and Fire Departments may also be reached by dialing directly the numbers shown below. Police Department numbers should be dialed in case an ambulance is wanted.

Location	Police Headquarters		Fire Headquarters	
Manhattan	SPRing	7100	RHI nder	1000
Bronx	TRE mont	6000	TRE mont	4000

Summer 1926

To Help You on Your Toll Calls

Manual and Dial Telephones

A TOLL call is one to any telephone connected with a central office located outside of your local service area. Your local service area is indicated on page 12.

Classes of Toll Calls

There are four classes of toll calls: Station-to-station toll calls, person-to-person toll calls, appointment toll calls, and messenger toll calls.

Station-to-Station Toll Calls

A station-to-station toll call is a call on which the calling party does not specify that a particular person or a particular Private Branch Exchange extension station is to be reached. Station-to-station toll calls are handled more rapidly and at lower rates than person-to-person toll calls. Charge is made if connection is completed, the time for which the charge is made beginning when the called station first answers.

Whenever possible the telephone number of the desired telephone should be given. If, however, you give the name and address of the subscriber whose station you wish to reach, you should at the same time state that you will talk with anyone who answers at that telephone.

A call which would otherwise be a station-to-station call is classed as a person-to-person call if request is made to reverse the charges.

Evening and night rates

Where the station-to-station day rate is more than 25c, reduced rates are in effect on station-to-station calls between 8:30 P. M. and 12:00 midnight, when Evening rates apply, and between 12:00 midnight and 4:30 A. M., when Night rates apply. The minimum Evening or Night rate is 25c, except where the day rate is less than 25c, in which case the day rate applies. Reduced rates do not apply on calls to British Columbia, Cuba or Nova Scotia.

For rates, see "Rate Schedules" following.

How to Place Toll Calls

On toll calls to points covered by the New York City Directory or by the General Suburban Directory give the details of the call to the operator. If the telephone number cannot be found in the directory, obtain it from "Information."

On calls to all points other than those mentioned above give the details of the call to the Long Distance operator, including the number if it is known.

Exception: On calls *by number* to Bridgeport, New Haven and Norwalk, Conn., Camden and Trenton, N. J., and Philadelphia, Pa., give the name of the city and the number to the operator; for example, "Philadelphia, Walnut 1234." If the number is not known, obtain it from "Information."

Note: If you are in doubt as to whether a call should be given to your operator or to the Long Distance operator, give the call to your operator.

Person-to-Person Toll Calls

(Evening and Night Rates do not Apply)

A person-to-person toll call is one which is made for a particular person or a particular Private Branch Exchange extension station. The rates are somewhat higher than station-to-station rates but no charge other than a report charge (approximately ¼ of the station-to-station day rate) is made unless the desired person or extension station is reached. Charge is made from the time that conversation with the particular person or with someone at the designated extension station starts.

Toll calls between nearby points must be made as station-to-station calls, no person-to-person calls being accepted between such points.

For rates see "Rate Schedules" following.

Report charges

Person-to-person toll calls including collect, appointment and messenger calls are accepted only under the condition that a limited charge (approximately ¼ of the station-to-station day rate) will be made if the called station is reached, but the particular person desired is not available and if a report to this effect is given the calling station within one hour from the time the call is placed or, when calls are being accepted subject to delay, within one hour beyond the delay reported. However, no report charge will be made if failure to establish the connection is due to a "busy," "don't answer," "out of order" or similar condition at the called station.

For report charges see "Rate Schedules" following.

Collect calls

Upon the request of the calling party, the charges on a person-to-person toll call (or report charges) will be collected at the called telephone if such charges are accepted at the called station. If the call is not completed because of the failure of the called party to accept the charges, the calling party must pay the report charge. Requests to have the charges collected in this way should be made at the time the call is given to the operator. The reversal of charges on station-to-station toll calls is not permitted.

Appointment Toll Calls

Appointment calls are person-to-person toll calls in connection with which the calling party has specified a definite time at which the conversation is to take place. The Company cannot guarantee the completion of the connection at the exact time specified.

For rates see "Rate Schedules" following.

Messenger Toll Calls

Messenger calls are person-to-person toll calls requiring the use of a messenger at the called station. The charge made by the messenger is added to the Company's charge for the call.

For rates see "Rate Schedules" following.

Rate Schedules

Schedules of Initial Period Toll Rates Referred to in the Preceding Page

When Station-to-Station DAY RATE is	$ .05	.10	(.14 .15)	.20	.25	.30	.35	.40	.45	.50	.55	.60	.65	.70 (a)

(a) and thereafter increasing in 5 cent steps.
(b) and thereafter one-half the day rate. When the day rate is not evenly divisible by 4, 25% in addition to the Station-to-Station day rate, computed to the next higher multiple of 5 cents.
(c) and thereafter one-fourth the day rate. When the day rate is not evenly divisible by 4, one-fourth the day rate, computed to the next higher multiple of 5 cents.
(d) and thereafter 25% in addition to the Station-to-Station day rate. When the Station-to-Station day rate is not evenly divisible by 4, 25% in addition to the Station-to-Station day rate, computed to the next lower multiple of 5 cents.
(e) and thereafter 50% in addition to the Station-to-Station day rate. When the Station-to-Station day rate is not evenly divisible by 2, 50% in addition to the Station-to-Station day rate, computed to the next lower multiple of 5 cents.
(f) and thereafter one-fourth the Station-to-Station day rate. When the Station-to-Station day rate is not evenly divisible by 4, one-fourth the Station-to-Station day rate computed to the next higher multiple of 5 cents; but no Report Charge will exceed $2.00.

* Not quoted on calls between points in New York State, or between points in New York State and New Jersey.

General Information

TO ARRANGE FOR SERVICE

The Telephone Company maintains a number of business offices throughout the city which handle all matters relating to new telephone service, removals, transfers, location of contracts, directory listings, directory advertising, adjustments of accounts, collection of bills, etc. The locations and telephone numbers of these offices, and the central office districts covered by each, are shown on the second page following.

TELEPHONE DIRECTORIES

This telephone directory is furnished by the New York Telephone Company to subscribers, free of charge, and remains the property of the Telephone Company. It shall not be mutilated and is to be surrendered to the carrier who delivers the subsequent issue. No binder, holder, or auxiliary device, except such as may be furnished by the Telephone Company, shall be used in connection with any telephone directory furnished by the Telephone Company.

Many call numbers are omitted from the directory. Information as to the Telephone Company's service, the use of our telephone books results in wrong numbers, which are annoyance both to subscribers and to the Company. If you do not receive a current directory or if directories other than those ordinarily distributed are desired, call or write the Business Office which will provide them.

The Company assumes no liability for damages arising from errors or omissions in the making or printing of its directories, except in the making of charge for listing, which shall be limited to the monthly rate for such listing for the time an error or omission occurs, provided notice in writing to the Company. The continues after reasonable notice to permanency of call numbers cannot be guaranteed by the Company; therefore, advised not to use the phrase "Telephone Connection."

TELEGRAM BY TELEPHONE

To facilitate sending telegrams and cablegrams, patrons having manual telephones should call by name for the Postal Telegraph-Cable Company or the Western Union Telegraph Company.

To send a Postal telegram or cablegram, call "Postal."

To send a Western Union telegram or cablegram, call "Western Union."

In either case you will be connected with an office of the designated telegraph company serving your local calling area. If there is no such office, you will be connected with the nearest business office. If there is no office so located, ask "Information" to assist you.

Patrons having manual telephones should dial the number shown in the directory for the Postal Telegraph-Cable Company or the Western Union Telegraph Company.

Telephone charges for telegrams, cablegrams and calls from subscribers' stations will appear on regular monthly bills. Charges from public telephone booths will be collected at public telephone stations in the usual manner.

By arrangement with the Postal Telegraph-Cable Company and the Western Union Telegraph Company, the telegraph charges for messages filed by telephone will be billed by the Telephone Company on telephone bills as regular charges.

Patrons calling, telegrams or cablegrams for transmission by telephone should call by number.

OVERTIME CHARGES ON LOCAL CALLS

In accordance with contract and tariff provisions a "local message" is a connection on a call five minutes or less in duration. Although it is not the Company's general practice to time all local messages as it is to time all toll messages, overtime charges will be applied wherever local messages from public telephone or subscribers' message rate stations are found to materially exceed five minutes in duration.

CRITICISMS OF SERVICE

Operators are required to be courteous in their dealings with subscribers but are not expected to engage in conversation beyond that necessary to complete connections.

The Company values the prompt reporting of faulty service. Criticisms of the service should always be made by telephone rather than in writing. Ask the operator for "Traffic Manager's Office," using another telephone, if necessary.

This class of telephone calls is free of charge.

FREE CALLS

Calls from any telephone in the Metropolitan Division may be made to any department of the Telephone Company in that Division without charge.

The Metropolitan Division includes the five Boroughs of the City of New York—Manhattan, The Bronx, Brooklyn, Queens and Richmond (Staten Island), the New York Counties of Nassau, Suffolk (Long Island), Westchester, Putnam, Rockland, the towns of Tuxedo and Greenwood Lake in Orange County and Greenwich, Conn., also the New Jersey Counties of Bergen, Essex, Hudson, Middlesex, Monmouth, Morris, Passaic, Somerset, Union and a part of Ocean County.

POLICEMEN and FIREMEN will be allowed Free Service, providing that at the time the connection is asked for, the policeman or fireman stating the call gives the operator his badge number and states that the call is made in the performance of his official duties, as follows:

(1) From any Public Telephone in the Boroughs of Manhattan and The Bronx to any other station in these Boroughs.

(2) From any Public Telephone in the Boroughs of Brooklyn and Queens to any other station in these Boroughs.

(3) From any public telephone in the Borough of Richmond, to any other station in this Borough.

On all free calls made from coin box stations, the coin deposited in order to call the operator will be returned.

REMOVALS (Change in Location)

On account of the time needed for changing telephone equipment from one location to another, notice in writing (or verbally) should be given at least ten (10) days prior to the time the change is desired. Such notice should be addressed to the nearest business office. Fee addressed and telephone numbers of business offices shown on fourth page following.

A large number of such orders are received about May 1st and October 1st each year. Ample advance notice (thirty days if possible) is therefore requested in order to enable us to make the changes with the least possible interruption to your service.

TERMINATION OF CONTRACTS

Contracts covering service or facilities (other than those providing for season service), which have been in force one month may be terminated without cost by giving ten (10) days' notice in writing.

SUSPENSION OF RESIDENCE SERVICE

When a residence is to be closed for any considerable period, the telephone service may be temporarily suspended without termination of contract or removal of telephone instruments, and under certain conditions. If arranged for in advance, a partial allowance will be made for a period not exceeding four months in any calendar year; the allowance for suspended service on party lines will be made for only one (1) period of four months or less in any calendar year. Bills will be rendered regularly while service is suspended, and the total allowance credited to the subscriber when service is resumed. This suspended service does not apply to business telephones.

BILLS FOR TELEPHONE SERVICE

Bills for local service will be rendered monthly in advance in accordance with the terms of the contract. Charges for toll and long distance messages will appear on the same bill, the charges covering a period of one month; but in order to render bills on the first of the month the period will begin and end several days before the end of the calendar month.

IDENTIFICATION OF EMPLOYES

Every employe of the Telephone Company authorized to inspect, repair or remove the Company's apparatus carries a metal badge showing the Company's name and his own number. Subscribers are earnestly requested to refuse access to their premises to anyone who cannot in this way identify himself.

ATTACHMENTS TO TELEPHONES

The Company's Tariff and the subscribers' contracts provide that no apparatus or appliance not furnished by the Company shall be attached to or used in connection with its facilities. Telephone instruments are designed to produce the best results and are necessarily very sensitive and intricate. The various unauthorized devices offered for sale and which are claimed to improve transmission, eliminate noise, destroy germs, supplant the telephone directory, etc., are unnecessary. Many of them put the telephone lines and business out of order and the Company, to protect its service, is compelled to remove them. Where ordinary apparatus does not adequately meet a particular set of conditions, special equipment will be furnished by the Company at reasonable rates.

INJURING TELEPHONE PROPERTY

A person who wilfully or maliciously displaces, removes, injures or destroys any line of telegraph or telephone, wire or cable, pipe or appliance, or material or property belonging thereto, without lawful authority, or who shall unlawfully and wilfully cut, break, tap, or make connection with any telegraph or telephone line, wire, cable or instrument, or read or copy in any unauthorized manner any message, communication or report passing over it, in this state; or who shall wilfully prevent, obstruct or delay, by any means or contrivance whatsoever the sending, transmission, conveyance or delivery, in this state of any authorized message, communication or report by or through any telegraph or telephone line, wire or cable, under the control of any telegraph or telephone company doing business in this state; or who shall aid, agree with, employ or conspire with any person or persons unlawfully to do, or permit or cause to be done, any of the acts hereinbefore mentioned, or who shall occupy, use a line, or shall knowingly permit another to occupy, use a line, a room, table, establishment or apparatus unlawfully do or cause to be done any of the acts hereinbefore mentioned. * * * is punishable by imprisonment for not more than two years.—Extract from Section 1433 of the Penal Law.

PRIVACY OF TELEPHONE SERVICE

A person who wrongfully obtains, or attempts to obtain, any knowledge of a telegraphic or telephonic message by connivance with a clerk, operator, messenger or other employe of a telegraph or telephone company, or being such clerk, operator, messenger or other employe, wilfully divulges to anyone but the person for whom it was intended, the contents or the nature thereof of a telegraphic or telephonic message or dispatch intrusted to him for the transmission or delivery, or of which contents he may in any manner become possessed, * * * is punishable by a fine of not more than one thousand dollars or by imprisonment, for not more than two years, or by both such fine and imprisonment.

Extract from Section 552 of the Penal Law, Chapter 40 of Consolidated Laws.

Summer 1926

Local Service Areas of New York City Subscribers and Public Telephones

Subscribers with Dial Telephones may Dial Directly Numbers in Their Own Local Service Area—To get other New York City Numbers Dial the Operator and Give Her the Desired Number. NOTE: To ascertain in what zone a central office is located, see the table at the foot of the page.

Summer 1926

Call our Engineers FIRST and save costly alterations

THE EXTENSIVE USE of the telephone in hotels, apartment houses, office buildings and large residences, makes it essential that in buildings of these types provision be made to carry the large number of wires necessary for furnishing telephone service.

When it is realized that in a number of buildings there are as many as 1,000 telephones in service and that it is necessary to carry two wires from each telephone to some central point in the building, the importance of making adequate provision for telephone wiring is apparent. If some arrangement is not included *in the original building plans*, it may be necessary to make extensive and costly alterations after completion of the building, in order to conceal the wires running through halls and rooms.

THE ENGINEERS of this company will be glad at any time to give *architects, owners* or *builders* the benefit of their experience in such matters and to assist them in planning the best system for each individual case.

For Manhattan and Bronx, Call Division Plant Engineer, 227 E. 30th St., New York City	Telephone	*Mad. Sq. Official
For Brooklyn, Queens and Long Island, Call Division Plant Engineer, 81 Willoughby St., Brooklyn, N. Y.	Telephone	*Main Official
For Westchester, Call Division Plant Engineer, 700 E. 242nd St. New York City	Telephone	*Hillcrest Official
For New Jersey and Richmond, Call Division Engineer, 309 Washington St., Newark, N. J.	Telephone	*Market Official

*Machine switching subscribers Dial "Operator" and ask her for this number.

NEW YORK TELEPHONE CO

SUBSCRIBERS IN

Brooklyn and Queens

May 5, 1926

Subscribers in the Borough of Queens located in places bearing a name different from the name of the Central Office through which they receive service, are listed with the name of the place in the address column.
Where the name of the place is the same as the name of the Central Office a street address is given.
